

THE CHALLENGES

- Deploy and scale resources quickly and as accurately as possible
- Provide users with a uniform experience, ATAWAD
- Guarantee the expected level of performance and security without constraints.

MODERN WORKPLACE – VIRTUAL DESKTOP

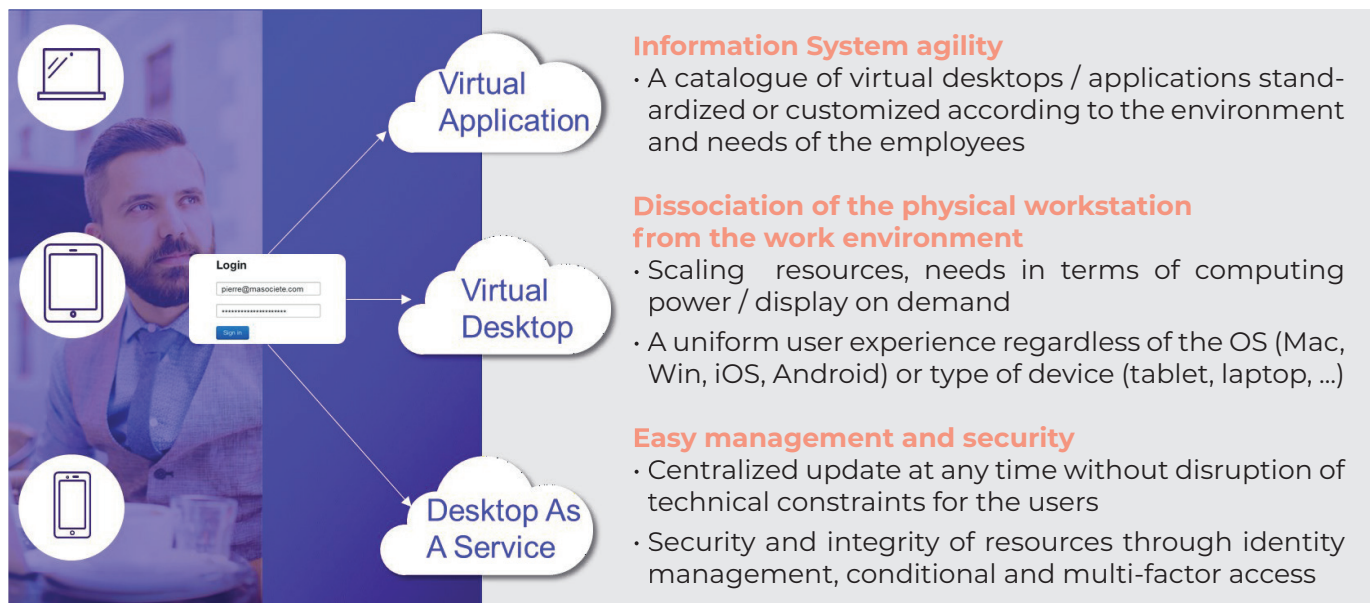

MOVE TO CLOUD PROVISIONING OF WORKSTATIONS

Promised by the Workplace, the agility of the work environment is still a strong challenge for companies.

Whether for teleworking, a merger / acquisition, the need to open up the information system to partners or peak in activities to be absorbed, organizations have to adapt, and develop rapidly the resources places at the disposal of their employees.

But how do you reconcile security, performance and successful user experience outside such contexts while meeting ever shorter deadlines and tight budgets?

To meet these challenges, Infeeny offers an integrated “move to cloud” approach based on the virtualization of applications and desktops

Customer Story - World leader in aerospace engineering education

Stakes

- Implement an agile environment accessible by students from all countries
- Address the different educational uses while respecting technical and financial constraints

Infeeny's response

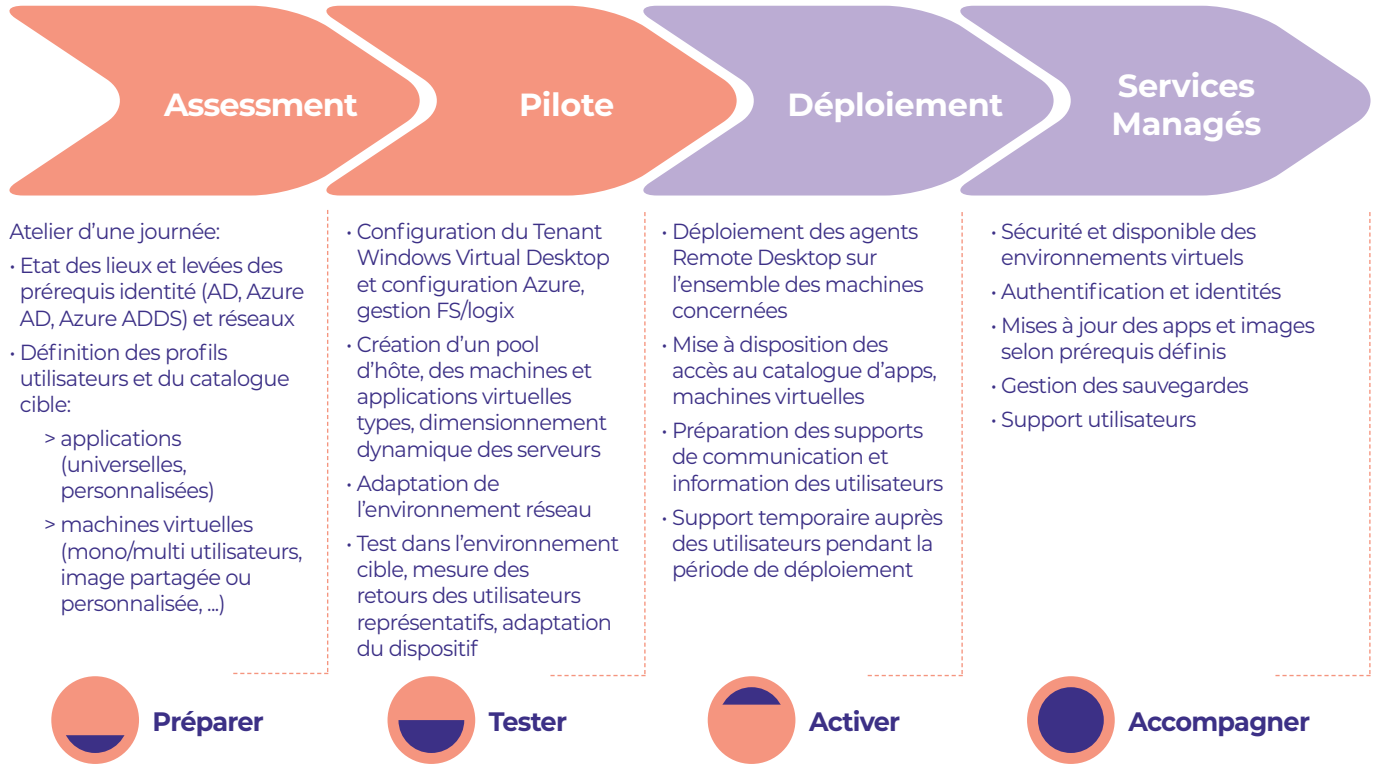

Implementation of multi-session WVD for students and Azure Lab for teachers:

- 2-step approach: pilot to assess solutions, then deployment
- Windows 10 Education with improved security and the collaborative and productivity components of Office 365
- Azure AD with conditional access, multi-factor authentication, shibboleth federation

Virtual Desktop by Infeeny

A customized and modular solution that is part of a continuous improvement process

Security and Operational Availability Updates

“The assurance of digital resources aligned with the needs of your employees”

- **A single point contact** for the entire value chain of the project. **360° coverage** including services, terminals and licences
- **Automated sourcing and scaling** of virtual desktops and applications. **Security support** (perimeter/identities/patches) without constraints for the user.
- **Controlled costs**: no infrastructure investments, pay per use (Azure and M365 subscriptions)
- **Project time** halved thanks to task automation.
